Profile

Software Engineer with a product-oriented and Forward Deployed Engineering approach, experienced in taking products **from ideas to production** across fintech, SaaS, AI automation and cloud environments. Work across product definition, software engineering, solution architecture, AI/LLM integration and production delivery.

Professional Experience

Front-End Developer & QA Analyst — Banco Cuscatlán

Nov 2025 – Present

- Develop and validate digital banking applications using **Angular and TypeScript**, covering authentication, payment, transaction and external-service workflows.
- Improve frontend maintainability through **lazy loading, code splitting, state management, code reviews and Jest unit testing**.
- Validate **Jira user stories against acceptance criteria** and support QA and pre-production validation.

Founder & Product Engineer — Numen Agency

Self-Employed · Jun 2024 – Present · delta-numen.com

- Founded and lead a digital product studio delivering **12+ client projects** across SaaS, AI automation and enterprise software.
- Built and launched **5 production products**, with an additional ERP in development, serving **10K+ cumulative users**.
- Own the lifecycle from **product discovery and requirements through architecture, development, AI integration, CI/CD and production releases**.
- Build with **React, Next.js, Node.js, Python, PostgreSQL, AWS, GCP and Docker**, integrating OpenAI, Claude, RAG, n8n and Ollama.

Product Engineer & Software Engineer — Cresium

Contract · Jan 2026 – Sep 2026

- Developed and optimized an **enterprise financial monitoring platform**, working across frontend, backend, API and data layers.
- Integrated **AI-assisted and LLM workflows using Anthropic Claude API** into financial and operational processes.
- Applied a **Forward Deployed Engineering approach**, translating business requirements into production-ready solutions while contributing to architecture, troubleshooting and performance optimization.

AI Automation Engineer — Litebox

Contract · Aug 2025 – Jan 2026

- Architected **hybrid RAG and agentic workflows** using Python, OpenAI, Claude, Gemini and Ollama with cloud/local inference routing.
- Built automation with **n8n, OpenClaw, APIs, browser automation and Playwright**, integrating GitHub Actions and SonarQube quality gates.
- Contributed to **70% less manual processing and 40% lower operational costs** through AI automation and workflow orchestration.

Full Stack Developer & IT Administrator — Ukiyo

Oct 2024 – Nov 2025

- Developed **4 banking applications from the ground up**, covering software implementation and API integrations.
- Managed **AWS and GCP infrastructure across 5 production environments** and automated CI/CD pipelines.
- Built PHP/WordPress platforms while supporting **monitoring, system administration, networking and internal IT operations**.

Platform, Cloud & SRE Engineer — Enterprise Client (NDA)

Contract · Jan 2025 – Jun 2025

- Designed multi-cloud **AWS/GCP infrastructure** using Terraform, Kubernetes, EKS, GKE and Istio.
- Built an **EKS–GKE Kubernetes PoC** supporting cross-cluster service discovery, workload identity and secure service communication.
- Integrated external **AWS EC2 workloads** into the service mesh and automated Linux provisioning with Python and Bash.
- Developed **CI/CD and infrastructure validation workflows** using GitHub Actions and SonarQube/SonarCloud.

Network & IT Support Intern — Fiscalía General de la República

Internship · Jan 2024 – May 2024

- Supported **network infrastructure and IT operations**, including connectivity, troubleshooting and infrastructure maintenance.

Frontend Developer & Server Administrator — Colegio Don Bosco

Internship · May 2023 – Nov 2023

- Built React interfaces and supported server monitoring, database optimization, firewall configuration and IDS administration.

Technical Skills

Engineering & Product: Software Engineering, Product Engineering, System Design, Solution Architecture, Product Development, API Integration, CI/CD, QA
Development: TypeScript, Python, JavaScript, React, Node.js, Next.js, Angular, PostgreSQL, MySQL
AI & Automation: LLMs, RAG, Agentic Workflows, OpenAI, Claude, Gemini, Ollama, Vector Databases, n8n, OpenClaw
Cloud & Platform: AWS, GCP, Kubernetes, Docker, Terraform, EKS, GKE, Istio, GitHub Actions, Jenkins, Linux, Bash
Testing: Jest, Playwright, SonarQube/SonarCloud

Education

B.Eng. in Computer Science — Universidad Don Bosco · Studies currently paused · GPA **8.9/10**
Associate Degree in Computer Engineering — Universidad Don Bosco · 2024 · GPA **9.0/10**
Languages: Spanish — Native · English — B2

Certifications

Anthropic: MCP Advanced
AWS: Cloud Operations · Cloud Security · Agentic AI
GCP: Cybersecurity · **MongoDB:** GenAI Applications
