# JULIAN MENDEZ

**Software Engineer · AI Automation · Cloud & Platform Engineering**
San Salvador, El Salvador · (+503) 6046-3566 · official.count.alejandro@gmail.com
GitHub · LinkedIn · delta-numen.com

## Profile

Software Engineer and Technical Lead focused on **full-stack systems, AI automation and cloud infrastructure**, with hands-on experience delivering SaaS, enterprise automation and production workloads across **AWS and GCP**.

## Professional Experience

### Frontend Developer — Banco Cuscatlán

**Nov 2025 – Present**

- Develop banking applications with **Angular and TypeScript**, building reusable component architectures for internal and client-facing platforms.
- Improve frontend performance and maintainability through lazy loading, code splitting, state-management practices and code reviews.

### Founder & Technical Lead — Numen Agency

**2024 – Present · Digital Product Studio** · delta-numen.com ↗

- Lead architecture and delivery for **12+ client projects and 6+ production products** across SaaS, AI automation and cloud-native systems.
- Build and operate full-stack platforms using **React, Next.js, Node.js, Python, PostgreSQL, AWS, GCP and Docker**, supporting **10K+ cumulative users**.
- Own technical decisions, CI/CD, release quality and AI-enabled workflows using **OpenAI, Anthropic, RAG, n8n and Ollama**.

### Freelance Platform Engineer — Enterprise Client (NDA)

**Contract · Project-Based · 2026**

- Designed and automated **cloud platform infrastructure across AWS and GCP** using Terraform, Kubernetes, EKS, GKE and Istio, applying Infrastructure as Code principles to networking, IAM, workloads and platform configuration.
- Administered and automated **Linux-based environments** using Python, Bash, shell scripting and remote execution workflows, supporting infrastructure provisioning, validation and operational troubleshooting.
- Built a **multi-cloud Kubernetes platform PoC** connecting AWS EKS and GKE through Istio, implementing cross-cluster service discovery, workload identity and secure service-to-service communication.
- Integrated external **AWS EC2 workloads** into the platform using SSM, VPC endpoints, security groups, certificates and token-based workload identity.
- Developed reusable automation for infrastructure deployment and configuration, integrating **Terraform, GitHub Actions and CI/CD quality gates** with SonarQube/SonarCloud.
- Supported platform reliability through automated validation, deployment controls, infrastructure troubleshooting and standardized cloud configuration across environments.

### Freelance AI Automation Engineer — Enterprise Client (NDA)

**Contract · Project-Based · 2026**

- Architected hybrid **RAG and agentic automation workflows** with Python, OpenAI, Claude, Gemini and Ollama, routing workloads between cloud and local inference based on cost and latency.
- Built multi-step orchestration with **n8n and OpenClaw**, integrating APIs, approval gates, retries, browser automation and remote workflow control through Slack and Telegram.
- Developed **Playwright-based QA automation** for responsive desktop and mobile web flows, covering regression, acceptance criteria and post-execution validation.
- Integrated **GitHub Actions and SonarQube/SonarCloud** for code analysis, quality gates and deployment validation, contributing to **70% less manual processing** and **40% lower operational costs**.

### Freelance Cloud & SRE Engineer — Enterprise Client (NDA)

**Contract · Project-Based · 2025**

- Built a multi-cloud Kubernetes PoC connecting **AWS EKS and GKE** through Istio with cross-cluster service discovery and routing.
- Provisioned infrastructure with **Terraform**, covering IAM, networking, kubeconfig, namespaces and Istio control-plane components.
- Integrated an external **AWS EC2 workload** into the mesh using SSM, VPC endpoints, security groups and certificate/token-based workload identity.
- Automated delivery and validation with **GitHub Actions** and **SonarQube/SonarCloud** quality gates.

### IT Administrator & Full-Stack Developer — Ukiyo

**Oct 2024 – Nov 2025**

- Delivered **4 banking-sector applications serving 500+ recurring users** with full-stack implementation and REST/SOAP integrations.
- Operated **AWS/GCP infrastructure across 5 production environments** and automated CI/CD for **3 applications** using Jenkins, GitHub Actions and GitLab CI.
- Implemented observability and performance improvements with Prometheus, Grafana, CloudWatch, ELK, MySQL, PostgreSQL and MongoDB.

### Network Administrator — Fiscalía General de la República

**Internship · Jan 2024 – May 2024**

- Supported LAN/WAN infrastructure, ACLs, VLANs and perimeter security, and automated backup routines through scripting and cron jobs.

### Frontend Developer & Server Administrator — Colegio Don Bosco

**Internship · May 2023 – Nov 2023**

- Built responsive React.js interfaces and supported server monitoring, database optimization, firewall configuration and IDS administration.

## Featured Project

### VieLinks — Social Media Management SaaS

vielinks.com ↗

- Built and deployed a multi-channel SaaS platform supporting **200+ active users**, integrating Meta, Instagram and LinkedIn OAuth/publishing workflows with React, TypeScript, Fastify, MySQL and AWS.

## Technologies

**Development:** TypeScript, JavaScript, Python, PHP, React, Next.js, Angular, Node.js, Fastify, Laravel, PostgreSQL, MySQL, MongoDB
**Cloud / DevOps / SRE:** AWS, GCP, Docker, Kubernetes, Terraform, Istio, EKS, GKE, GitHub Actions, GitLab CI/CD, Jenkins, SonarQube, Prometheus, Grafana, CloudWatch, ELK
**AI / Automation / QA:** OpenAI, Anthropic/Claude, Gemini, Ollama, RAG, Vector Databases, n8n, OpenClaw, Playwright

## Education

**B.Eng. in Computer Science — Expected 2026**, Universidad Don Bosco · GPA **8.9/10**
**Associate Degree in Computer Engineering — 2024**, Universidad Don Bosco · GPA **9.0/10**
**Languages:** Spanish — Native · English — B2

## Certifications

**Anthropic:** MCP Advanced ↗ · **AWS:** Cloud Operations ↗, Cloud Security ↗, Agentic AI ↗ · **GCP:** Cybersecurity ↗ · **MongoDB:** GenAI Applications ↗
